

Enhanced Procedures Implemented due to COVID-19, Windsor/Pelee Operations

AIRCRAFT SANITIZATION – Due to the outbreak of COVID-19 Cameron Air has implemented new cleaning procedures for our aircraft. After every flight leg conducted the seats and belts of the aircraft will be cleaned using sanitization wipes. The interior of the aircraft will also be sprayed using a disinfectant spray.

PASSENGER SCREENING – Any passenger who is experiencing symptoms of the COVID-19 virus is asked to not fly. If you are experiencing symptoms you are asked to contact the Owen Sound Transportation company by phone (1-800-661-2220 or 519-326-2154) prior to your booking. Any passenger showing symptoms of COVID-19 can be denied boarding by the flight crew. If you are arriving from an international trip we ask that you advise the Owen Sound Transportation Company prior to showing up for your flight. Great Lakes FBO has restricted access to its facilities for travellers from international destinations and special arrangements will have to be made. These procedures are being put in place to protect the Pelee Island and Windsor communities, protect your fellow passengers and our staff and follow government recommendations to reduce the spread of COVID-19.

We thank you for your cooperation,

Tom Lindsay
Operations Manager
Cameron Air Service
