

Section 4 - Important Information

Cameron Air Service requires that all persons boarding our aircraft be vaccinated against COVID-19 unless they have a valid exemption.

In order to receive a valid exemption for non-medical reasons, the person (or their parent or legal guardian if the person is under the age of 18) must complete this Statement of Creed/Religious Belief form and have it sworn or affirmed before a Commissioner of Oaths.

The person requesting an exemption (or their parent/legal guardian, if a minor) must submit a completed copy of this form in its entirety.

Risks of not being vaccinated:

You may be more likely to be exposed to the COVID-19 virus than others if you live in a group setting or participate in group activities in closed/crowded spaces where the COVID-19 virus may transmit more easily.

COVID-19 can result in severe illness. Those who are at particular risk of developing more severe disease or outcomes from COVID-19 are people:

- who are an older adult (increasing risk with each decade, especially over 60 years)
- of any age with chronic medical conditions, including: lung disease, heart disease, high blood pressure, diabetes, kidney disease, liver disease, dementia, or stroke
- of any age who are immunocompromised, including those with an underlying medical condition, such as cancer or those taking medications which lower the immune system, such as chemotherapy
- living with obesity, such as having a body mass index (BMI) of 40 or higher

Vaccination is one of the most effective ways to protect our families, communities, and ourselves against COVID-19. Evidence indicates that vaccines are effective at preventing serious outcomes, such as severe illness, hospitalization, and death due to COVID-19. A growing body of evidence indicates that people fully vaccinated with an mRNA vaccine (Pfizer-BioNTech and Moderna) are less likely to have asymptomatic infection or to transmit COVID-19 to others.
