Carriage of Dangerous Goods
M.S. Chi-Cheemaun

All dangerous goods must be carried in accordance with the Transportation of Dangerous Goods Regulations and the Cargo, Fumigation and Tackle Regulations.

Acetylene

- Service vehicles carrying acetylene are asked to call OSTC in advance to book (see "Service Vehicles" for more information).
- A maximum of one (1) cylinder of acetylene in a cylinder not exceeding a capacity of 46L may be carried.
- Cylinders must be secured to the vehicle in an upright position by permanently installed fittings. Valves must be securely closed and protected by a metal cap.

Argon

- A maximum combined mass of 150kg is permitted.

Air, compressed

- A maximum combined mass of 150kg is permitted.
- Cylinders must be secured in vehicles.

Firearms and Ammunition

- Must be carried in accordance with the Firearms Act.
- Firearms must be unloaded with a secure locking device attached. Remove any bolts if applicable.
- They must be in a locked container and stored out of sight in your vehicle. Ensure your vehicle is locked during the transit.
- Ammunition must be stored in a separate locked container.
- Walk-on passengers with firearms must notify the terminal upon arrival. Upon boarding, a designated crew member will assist the passenger with storing the firearms and ammunition safely onboard.
- Law enforcement officers are permitted to carry weapons while on duty.
- Bows should be secured in a similar manner to firearms.

Fuel

- **Diesel**
  - Diesel fuel is permitted in containers that meet the *Transportation of Dangerous Goods Regulations*. There are no restrictions on the number of containers.
- **Gasoline**
  - Can be carried in approved containers not exceeding 25L. Must be secured inside the vehicle. Walk-on passengers are not permitted to carry gasoline.

    - Cars, trucks, RVs can carry one (1) container each.
    - A vehicle with a trailer can carry one (1) container for the vehicle and maximum two (2) in the unit being towed.
    - Used and empty gasoline tanks are treated the same as full tanks and are subject to the same quantity restrictions.
- **Propane**
    - Each vehicle may carry a maximum two (2) cylinders not exceeding 30lbs each. No limit on small (1lb) cylinders for personal use.
    - Maximum combined capacity of propane cylinders cannot exceed 65L. Valves must be closed and tagged by OSTC staff to confirm they are properly closed.
    - Used and empty cylinders are treated the same as full and are subject to the same quantity restrictions.

Hay and Straw

- Passengers transporting hay and straw in any quantity must complete a Dangerous Goods Shipping Document and attach the dangerous goods placards to the cargo. If you do not have placards, please request them at the terminal and return them to a staff member when you disembark on the other side.
- Hay and straw must be covered at all times.
- Hay or straw that is damp, wet or contaminated with oil cannot be carried onboard.

Oxygen, compressed

- Portable oxygen for personal medical use is permitted onboard in the passenger areas.
- Oxygen not in use for medical reasons must remain on the car deck.
- A maximum combined mass of 150kg is permitted.

Pyrotechnics

- Not permitted in any quantity.

Service Vehicles

- Service vehicles are asked to call OSTC in advance to book.
- Service vehicles may carry a maximum of one (1) cylinder of propane not exceeding 46L, one (1) cylinder of compressed oxygen not exceeding 50L and one (1) cylinder of acetylene not exceeding 46L (see “Acetylene” for more information).

Other products

- If you intend to carry dangerous goods that are not listed here, please contact us prior to making a reservation. Please have the UN number and proper shipping name ready.

OSTC staff may request that passengers store in their vehicles or an onboard storage locker any items perceived to be unsafe to passengers, crew or the vessel.
